## Heald's Business College

**"The Popular School"**

The best argument we can advance for the merit of Heald's Business College is our thirty-six thousand graduates, now conducting business affairs and holding positions of the highest responsibility.

### WE STAND ON MERIT

Heald's Colleges represent the accumulated experiences of almost half a century of educational work, and it is useless to attempt to enumerate the hundreds and thousands of business firms, colleges, etc., employing our graduates. Twelve schools means twelve opportunities.

## PREFACE

---

**I**N placing the 1911-1912 Edition of the Richmond-Pullman-San Pablo and Stege Directory to our patrons, we feel that it will be found accurate in every particular; especial pains have been taken to bring every department up to the latest possible date. No expense has been spared to give a Directory equal in every respect to those published in the largest cities of the country.

The experience of the past years devoted exclusively to Directory making has been used to excellent advantage in the compilation and publication of this directory, and it is confidently believed that this publication will elevate the standard of Directories in California, and it will be found the equal, if not the superior, of any similar publication in America.

Thanking our patrons for the liberal patronage bestowed upon this work, we remain

Respectfully,

**R. L. POLK & CO.**

# RICHMOND

---

**R**ICHMOND is located thirteen miles north of Oakland, and is connected with that city by The Southern Pacific and Santa Fe Railways and by electric cars.

Here is the great Western plant of the Standard Oil Company, the largest refinery west of Chicago. Its establishment at this point involved two great undertakings—the laying of a double pipe line from the oil fields of Kern county, 260 miles distant, the creation of pumping stations at frequent intervals to force the heavy crude oil from the wells to the reservoirs at tide water, and the building of the complex and immense refining plant, including a can factory with a capacity of 30,000 five-gallon cans per day. How complex is the system of refining the crude California oil with its asphalt base only an expert could tell.

Two large wharves are part of the necessary equipment, and the assembling of a fleet of vessels to carry the product.

About 1,000 men are employed regularly, many more being required when the Company is doing any constructive work.

Richmond was chosen by the Standard Oil people because of its location, its San Pablo hills, its harbor, and its transportation facilities. The system is so arranged that the oil is handled almost entirely by gravity, the oil flowing from the highest points into the tanks lower down, to be from thence drawn off, refined and treated.

Pumping plants are located on the bay shore and other places where gravity is not available, the wharf carrying pipe lines through which are forced the cargoes of oil-carrying vessels. The plant covers 300 acres and is laid out systematically in divisions, streets and blocks.

A fleet of carrying steamers and vessels are required, and trainloads of products go by land every day in the year. Nearly 100,000 barrels of crude oil were handled during the month of May from the various districts from which this company draws their supplies. The works has its whale-oil plant near the bay shore, great car shops for repairing and equipping cars, can and barrel factories on the wharves at Point Orient whence are shipped the case oils to China and Japan.

The California Wine Association is another large corporation with headquarters and works at Richmond. "Winehaven" is at the extreme end of the Richmond peninsula, occupying a tract of forty-seven acres, and using a wharf 2,000 feet long, and the Belt Line Railway to facilitate handling freight. The plant has a crushing capacity of 25,000 tons of grapes and can store 10,000,000 gallons of wine. The company owns vineyards and operates wineries in nine or ten counties, about forty in number, and seeks to include all valuable grape-growing districts, qualities of soil, temperature and exposures. This is one of the largest establishments of the kind in the world. The trade of the Association is practically world wide, reaching the various countries in Europe, Egypt, the Philippines, Hawaiian Islands, China, Japan and South America.

About one hundred men are employed ordinarily at Winehaven, but during the active season the total number will reach into the thousands.

It is the aim of the Association to keep California wines pure, and to promote their use as better than the distilled liquors used in this country.

The Pullman Car Company of Chicago has finished the erection of a plant covering twenty-one acres of ground near the city limits, which, is employing at present in the neighborhood of 1,500 men. This plant, which consists of seven large buildings, is devoted exclusively to the repair of the Company's cars on the Pacific Coast division of all the large transcontinental roads, including the Southern and Western Pacific, the Santa Fe, the Oregon and Navigation, the Great Northern and the Northern Pacific railways. The Western shops of this great corporation have heretofore been located at Denver, Colorado, but the Company decided that they could be operated more profitably at San Francisco and chose Richmond as the site for their new location.

The Western Steel and Pipe Company of Los Angeles has located a large pipe and steel works in Richmond, employing 200 men and with the Company contemplating added improvements to the plant this force will be even more enlarged.

Richmond also has the repair shops and terminal yards of the Santa Fe Railroad, employing 500 or more men; the Richmond Machine and Iron Works, the Berkeley Steel Co., the Richmond Manufacturing Co., the Richmond Pottery Co., the

Los Angeles Pressed Brick Co., the Central Brick Co., the San Francisco Quarries Co., the Richmond Stone Quarry Co., chemical works, cocoa works, planing mills, flour mills, lumber yards, harvester works, breweries, ship yards, etc., representing probably a capitalization of \$30,000,000 and paying out to employees fully \$250,000 per month.

Many of the manufactories along this seventeen-mile water front are large enterprises with ample capital and an established business reaching all along the Coast and represented in many Eastern centers.

### POPULATION STATISTICS.

Number names in Richmond City Directory:

1909—3422 names; population 8655.

Increase in population over 1909, 435

1910—3592 names; population 8980.

1911—5452 names; (Including the residents of San Pablo, Stege and Pullman). The population of **Greater Richmond, 13,625**, and that of Richmond proper, 9480.

Increase in population over 1910, 500.

The basis of these figures is obtained by using the customary multiple of two and one-half per cent, multiplied by the number of names that appear in the current issue of the Directory.

# SUNSET

The Panama-Pacific International Exposition to be held in San Francisco is not a San Francisco Fair nor even California's; but the Fair of all the Far West.

Richmond will gain as much as any city on the Coast. It is therefore up to Richmond to boost for the Exposition and to do its share of the work to bring the World to California in 1915.

Boost how? — here's the answer:

Commencing in the January issue Sunset will have an Exposition Section to be edited by the Director of Publicity of the Exposition. This section will tell the world of the plans and progress of our wonderful hundred million dollar World's Fair.

Boost for the exposition by sending Sunset East. Send it to your friends; send it to your banking exchanges; send it to your business acquaintances; send it East.

The cost of your own subscription is \$1.50; for your own and one other \$2.50; for your own and four others \$5.00 and \$1.00 each thereafter. Be a Booster. Send to
